DETAILED ACTION

Allowable Subject Matter

1. Claims 3-7 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claims 3 and 4. U.S. Patent No. 6,487,227 to Kuramachi and U.S. Patent No. 6,804,282 to Shigihara et al. both teach similar systems to that of the present application. However, with respect to independent claim 3, Kuramachi and Shigihara, as well as the other prior art of record, fail to teach or suggest a dielectric multilayer film on the rear end face and having a second reflectivity, higher than the first reflectivity, and at least 40% at the characteristic wavelength, wherein the dielectric multilayer film includes a film of aluminum oxide in contact with the rear end face, a film of silicon oxide, and a film of tantalum oxide. With respect to independent claim 4, the prior art of record fails to teach or suggest a dielectric multilayer film on the rear end face and having a second reflectivity, higher than the first reflectivity and at least 40% at the characteristic wavelength, wherein the dielectric multilayer film has, in sequence, from the layer in contact with the rear end face, at least three paired layers, and a final film of aluminum oxide, and each of the paired layers includes an aluminum oxide film, and a tantalum oxide film.
